# 1 Data file path indexing

In order to construct a reproducible, first we must index the metadata and data filepaths. This can be done using the base *R* functions `list.dir` and `list.files`.

Table 1: Overview of the Raw File Index

<b>Filetype</b>	<b>Subdirectory</b>		
	Nars-31	Nars-42	Root
<b>csv</b>	0	0	32
<b>JPG</b>	89	76	0
